SKILLS

Software Engineering Javascript TypeScript Java Scala Algorithms Photoshop

Data Science Machine learning Optimization Hadoop Spark

EMPLOYMENT

Full stack developer/Co-founder, Flownotes

Participated in development from scratch of Online notepad with dynamic content recognition2016-12 — Present and deep content type interactions

- Participated in development of Minimal Vialible Product
- Performed testing for various types of product's components
- Wrote initial user/developer documentation, code styles, design guide

TypeScript React Redux WebSocket WebWorkers

Full stack developer, GetGPU

Participated in development from scratch of online service that gives cheap and affordable gpu2016-02 — Present instances

- Participated in development of Minimal Vialible Product
- Created a RESTful API endpoints using Scala and Akka

Java Ansible

Software engineer/Co-founder, Minority

Initiated development of workflow managment platform that helps people to describe their daily2015-12 — Present activities and to automate routine tasks

- Worked boilerplate development
- Hiring external developers for delegation development activities
- Preformed testing for various types of product's components
- Wrote initial user/developer documentation, code styles, design guide
- Implemented payment system using Stripe

Java Scala AngularJS nginx Akka PostgreSQL

Upwork, Software engineer

- Build large-scale web applications and mobile-first urls using JavaScript, React, AngularJS,2015-10 — Present and Java/Scala
- Researched and implemented new technologies including isomorphic JavaScript and MVC frameworks
- Collaborated closely with designers, copywriters, business stakeholders, and other developers
- Was a representative between business stakeholders and developers

Software engineer, Stampsy

A single place to share, curate and discover visual content that tells a story.2015-06 — 2015-10

- Created new React components, and contributed to legacy architecture
- Designed interface mockups, web forms, and information architecture
- Wrote HTML, CSS, JS, and TypeScript code for front-end
- Tested, revised, and deployed code. Found and resolved Section 508 compliance issues
- Wrote internal and user-facing documentation, and led document reorganization project

JavaScript React Redux Photoshop

Software engineer, 2GIS

2GIS is a free business listings with a city map.2015-05 — 2015-08

- Improved user experience and user interaction on client-side
- Bu using plain modular javascript
- Created rich, flexible, standards-compliant urls using Ruby on Rails and hand-coded HTML5, CSS3, and JavaScript

JavaScript

Software engineer, Hochuli

Service for collecting items around all internet marketplaces where users can bookmark any2015-03 — 2015-05 item and recieve price updates

- Created rich, flexible, standards-compliant urls using Ruby on Rails and hand-coded HTML5, CSS3, and JavaScript

RubyOnRails Web Scrapping Photoshop

Software engineer, Knigipodarki

Knigipodarki - online book store with referral features for recuring customers2015-01 — 2015-03

- Develop a rich, responsive back-end, building from the ground up using Ruby on Rails
- Collaborated with programmers, the CEO, and partner companies to resolve issues. Wrote documentation

RubyOnRails nginx SAP Integration

Software engineer, Dextra

Worked in one of major local web agency in my home region2013-12 — 2014-12

- Develop a rich, responsive back-end, building from the ground up using Ruby on Rails
- Collaborated with programmers, the CEO, and partner companies to resolve issues. Wrote documentation
